Ventilation

Gas units must be vented.

Drive Mechanism

Individual gear motors drive each spit.

Installation Requirements

Licensed gas fitter for all gas connections and checkout. HVAC specialist for air evacuation. Placement of this machine is critical since it is hot. Plan carefully.

Front Facings

Machine is made with high grade polished stainless.

Service, Maintenance, and Construction

All panels, accessing fat collection areas, are made from high grade, acid resistant, stainless steel. The unit employs few moving parts which reduces probability of breakdowns. Angle iron construction ensures a durable long life. Motors are easily accessible. Unit is fully plumbed and requires a single gas connection. No oiling or greasing is required on any part.

Safety

Standing pilots and gas pressure regulators. Drip drawers below the heat source prevents fat fires. Individual controls to control each burner. Separate switches for lower and upper rows of motors. Low rpm motors for ease of loading and unloading product. Heat diverting shields prevent spit handles from getting hot.

*Specifications are subject to change without notice. When ordering please specify voltage, phase and frequency requirements.
